

# EHR Readiness Preparation Report

## Personalized for your Practice

### *Why do I need the EHR Readiness Preparation Report?*

Your EHR Readiness Preparation Report is an indispensable tool to help you achieve meaningful use of your EHR. It is a short-cut to increased clinical efficiency and a road map that helps you avoid the pitfalls many clinicians fall into when implementing an EHR. The recommendations can be implemented at your own pace.

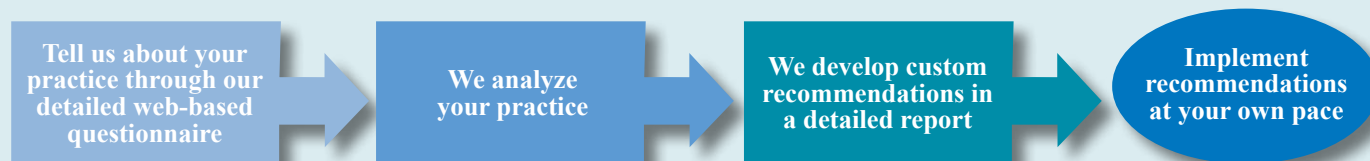

The report contains:

- Clinical Best Practices - customized to your practice at your fingertips without having to spend countless hours doing research
- Customized advice on achieving clinical efficiency and meaningful use milestones as quickly as possible
- Advice on how to practice medicine more efficiently with the EHR so you spend your valuable time taking care of patients
- A list of pitfalls applicable to your practice and how to avoid them
- Data-driven and anecdotal hints and tips from successful implementations
- Actionable recommendations that you can use right away to achieve **EHR Success** and **Meaningful Use**

The Readiness Report is a personalized reference guide written specifically for your practice and your staff. The report enables you to focus on specific best practices that will yield the greatest benefits for your practice. It also identifies areas of practice disorganization that an EHR can exacerbate and clearly explains how to overcome them. Follow our recommendations so you can practice medicine, instead of dealing with EHR related problems.

### *How does InfoClin develop your Customized Report?*

- We conduct a thorough analysis of your practice using our validated questionnaire
- We examine over 20 areas of risk that could potentially cause the EHR implementation to fail that are unrelated to the EHR software itself and help you prevent them
- We identify areas of opportunity to improve clinical efficiencies
- We select the appropriate best practices for your clinic from our over 30 Clinical Best Practice recommendations
- We provide you with best practice advice on achieving meaningful use goals distilled from the medical literature and from our consulting engagements with physicians
- We also provide a checklist of corrective actions that need to be implemented

### *Why spend countless hours conducting your own research?*

Let our experts customize recommendations to the unique needs of your practice.

# EHR Readiness Preparation Report

## *Why do most EHR implementations fail?*

- Time constraints faced by staff and physicians
- Lack of project management skills
- Lack of time to review literature and learn best practices
- Little to no prior experience in EHR implementation
- Inability to prioritize and apply the appropriate EHR implementation best practices to a unique clinical situation
- Inability to make necessary changes in practice to accommodate the EHR

## *Benefits of the EHR Readiness Preparation Report*

- Avoid costly mistakes
- Identify and resolve issues that increase risk of failure
- Improve office efficiency and patient flow
- Improve patient experience and satisfaction with the care they receive
- Improve chronic disease management
- Improve prevention services provided to patients
- Improve use of EHR for higher quality documentation
- Increase professional satisfaction with EHR use
- Achieve Meaningful Use and reap the benefits of EHR

## *About InfoClin*

- InfoClin was established in 2002 to help physicians become more effective in their use of EHRs
- InfoClin implementation services are based on a systematic review of the literature which was highly recommended in the 2009 BlueCross and BlueShield of Alabama Health Information Technology Action Plan
- Our team has over 15 years of experience in change management
- We have helped 100's of physicians with the use of their EHR
- We have collected Best Practices in EHR implementation and used them for over a decade
- We have learned many pitfalls of EHR implementation and know how to identify them and help your practice avoid them
- We have published numerous papers in medical journals
- We have held seminars and workshops at numerous conferences in the US and Canada
